The Navigator Company increases paper prices in North America

The Navigator Company announced today that will increase the price of all Navigator North America rolls by about 8-10%. This measure includes Navigator Premium Inkjet and Soporset Premium Opaque Offset Printing Papers (Text & Cover & Digital), Navigator Copier, and Express Offset and Bond rolls.

The company also increases the price of all cut size, folio text and cover, and digital papers including Navigator, Pioneer, Discovery and Soporset in North America by about 6-9%.

This increase will be effective for all dispatches from 1st July, and the Company will inform shortly about the details of the new prices to be applied by category.

This decision was taken due to unsustainable low levels of profitability across the industry and following the recent announcements of worldwide increases in pulp and logistics costs.

The Navigator Company sells its products to 130 countries over five continents, under its paper brands with a strong reputation for superior and consistent quality - Navigator, Pioneer, Inacopia, Discovery, Soporset, Target and Inaset.
