

18th February 2021

The Navigator Company increases tissue prices by 6 to 8% effective 1st April 2021

The Navigator Company announced today that it will increase tissue prices by 6 to 8% in all markets.

This increase will be effective for all dispatches from 1st of April. The Company will inform its clients shortly about the details of the new prices to be applied.

This decision was taken following the generalised and significant price hikes in many input cost, notably in commodities like chemical products, packaging products (plastics and containerboard), logistics, and pulp, being the latter the main cost factor for tissue production.

The tissue industry has seen abrupt price increases of 15-20% or more in some of these input costs over the last 3 months, which made it impossible not to reflect these in its finished goods prices.

The Company will continue working to reinforce its partnerships with clients, strengthening its value proposition across several dimensions, appreciating the support provided by its large customer base.
